

CSI double-wall jars and caps produced with "Flash Color" colorants

Description

- We now offer our customers 6 six new, intense "Flash Color" colorants that are on trend for 2012—Polished Metal, Passion Plum, Egyptian Gold, Moss Green, Rocket Red and Electric Blue.
- These new iridescent, jewel-tone Flash Color shades are 33% brighter than ordinary colorants used in plastics.
- Utilizing the proprietary Flash Color manufacturing process, the particle size of the mica used is controlled with a much tighter tolerance than previously possible. It results in a narrower distribution of light coming off of the particles, giving the Flash Color shades a significantly brighter flash.

Features & Benefits

- The brightest iridescent-type products on the market today—a great way to make your packaging stand out on the shelf or in the consumer's home.
- Available as a color option for all CSI Jars and Caps produced in polypropylene (PP), polystyrene (PS), or Styrene Acrylonitrile (SAN)—no limits to what we can do for your brand
- Colorant made in USA
- Jars and Caps made in USA—Manufactured at CSI, a manufacturer specializing in double-walled jars and closures
