

**Lowest Carbon Footprint**  
Uses Plant-based Resins

Bio-Based jar pictured with silver, non-Bio-Based cap.

## Features & Benefits:

- Material properties close to traditional PP – simplifies the amount of testing required to use our Bio-Based jars
- Plant-based resin made from industrial-quality starch derived from tapioca, potato and other sources – does not divert resources from the food supply but instead utilizes a by-product of food processing (same starch is used for paper, textiles and glue)
- Reduced energy expenditures as plant-based resins are obtained from renewable sources, produced at lower temperatures and require shorter cycle times – Lowest carbon footprint of any jar
- Made in USA – Timely availability with world-class environmental and quality standards

## Jar Specifications:

Capacity	Style	Size	Outside Diameter	Overall Height	Fill to Overflow	Deco Area (H x Cir)
2 fl oz/59 ml	SR	58mm	2.35"	1.96"	2.59 fl oz/77 ml	1.00" X 7.12"
	SS	58mm	2.35"	1.96"	2.59 fl oz/77 ml	1.22" X 7.12"
4 fl oz/118 ml	SR	89mm	3.65"	1.77"	6.1 fl oz/180 ml	0.60" X 11.19"
8 fl oz/237 ml	SR	89mm	3.66"	2.64"	9.35 fl oz/276.5 ml	1.44" X 11.20"
	SS	89mm	3.68"	2.65"	9.35 fl oz/276.5 ml	1.62" X 11.20"

## Cap Specifications:

Style	Size	Outside Diameter	Overall Height	Deco Area (Diameter)
SS	89mm	3.63"	0.61"	3.50"

## Decoration Options:

- Silk-screen
- Pressure-sensitive labels

## Description:

Bio-Based jars are made from a new hybrid resin blended with 32% natural, renewable plant-based resin and 68% traditional polypropylene to create an environmentally-responsible packaging alternative! According to Michigan State University and an independent testing laboratory, biopolypropylene resin shows a 27% reduction in carbon dioxide emissions relative to traditional polypropylene components – imagine what an impact your company can make to help the environment by switching to our Bio-Based jars! Five jars and one cap available in a range of shades.
